

Micropressure: Igniting the Crystalline Ocean of Light (Paperback)

By Joska Ramelow

White Lion Press, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Joska Ramelow s book Micropressure provides a new and exciting look at energy healing and balancing. It takes the reader on a journey into the vast depths of the human body on the basis of 21st century scientific research findings. We explore the world of nested liquid crystals, fractal iterations and so understand the what, how and why of the inner and outer wheelwork of nature in a very fresh light. As happens so often, this book came in response to an astonishing healing experience Joska had with a ruptured shoulder muscle, which healed itself overnight, using a method developed by Dr. Jan Smith, a PhD in electrical engineering. Dr. Smit researched the electrical potentials of human bodies in health and disease, and finally put it to the test by balancing the East German Olympic team before competitions, with stunning results. Many testimonials in the book provide a broad spectrum of evidence that you do not have to be an Olympic athlete to benefit from the outstanding effects of this new system of Micropressure and bio-pulsing.
