

Investing for Take-Off: Growth to Sky-Is-The-Limit (Paperback)

By Feliciano Bantilan

Createspace, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The book presents a new way of seeing - and thus, of doing - investing in the stock market. The new way sees investing as dependent on the dynamics of the two forces driving the stock market - the random force and the causal force. The random force is a buy or a sell of shares of stocks, sending the price up or down. The causal force is a net-buy over a period, sending the price up. The sign of the contribution to return distinguishes the random force from the causal force - the former contributes both positive and negative change, while the latter, only positive change. This sign difference determines the trajectories of the two forces diverging over time. Over the long term, the sum of return changes arising from the random force is zero, due to cancellation; the corresponding sum from the causal force, in the absence of cancellation, grows with time without limit. Therefore, there must be a point in time, when the sum of the return contributions of the causal force starts to pull away from the corresponding sum...
