Date :2008-04-01 version 2. This book points on the two volumes published. the book mainly includes functions. limits. continuity of functions. function of one variable differential and palm its application. function of one variable calculus and its applications; the next volume of the main contents include vector algebra and analytic geometry of space. multi-function differential calculus and its applications. re-integration and its applications. the curve integral and surface integral. infinite series. ordinary differential equations . End of the book is accompanied by mathematical experiments. several commonly used around the curve and the common surface of the three-dimensional graphics. points table. exercises the answers. This book aims to learn the basics of mathematics and mathematical thinking to strengthen the quality of the training integration. focusing on geometric visual representation of mathematical concepts. illustrations. structured. thorough reasoning. easy to understand. The book selected examples. exercises wide coverage. with strong representation. This book can serve as the professional institutions of higher undergraduate science and engineering materials. engineering and technical personnel are also available for study reference. Contents: Chapter VII Section vector algebra and analytic geometry of space vector concept and a linear operator. the concept of two vectors. the vector of the linear operator exercises Section 7.1 represents a vector of coordinates. Cartesian coordinate space system II vector and the axis of projection projection theorem III Section 7.2 exercises the coordinates of the vector multiplication of a vector. vector scalar product two. three vectors of vector product. vector product mix 7.3 Fourth Exercise spatial section of space curve with a surface. surface and equation two. the space curve and its equation of three. the second...
