Thorough guideline! Its this type of good read. It is really simplistic but shocks from the 50 percent from the publication. It is extremely difficult to leave it before concluding, once you begin to read the book.

In putting this little book before the public, it is the author s aim to give his readers a practical and concise treatise on the keeping of poultry on a limited space of ground. I have found that it requires about one hundred pounds of grain food per year besides green foods, etc. to keep a fowl in satisfactory condition. At the prices now charged for mixed grain, one hundred pounds of feed will cost about two dollars. Home prepared foods, after the formulas given in this book will cost 25 to 50 per cent. less. But even with the high grain prices current, one may expect to make a profit of at least three dollars per hen. Because of the limited space, a back yard plant should make a specialty of breeding-stock; permitting the poultry farmer with a larger area to specialize in the production of eggs for commercial use.
